Professional Experience:

- **Company: Dalmet Technology Pvt LTD, Pune**

Role: Salesforce Developer

Work duration: **Jan 2020** – Present

Project Experience:

Project Title: Manufacturing CRM

Duration: May 2020 – till date

Project Description: This client is a leading manufacturer of energy products. They are using the Salesforce application to sell their different categories of products and suppliers. Sales representatives create Prospects by conducting campaigns and converting them into leads by follow-up and by conducting meetings. After converting them into leads, convert them into opportunities by explaining to them about products. This will provide services to the sold products. In Salesforce we implemented the services using case object. These Sales management was implemented in Salesfroce.com.

Role: Salesforce Administrator | Salesforce Developer

Responsibilities:

- Involved in SFDC application setup and customization to match the Company's functional needs.
- Worked as Salesforce admin support governing user account creation, personal information setup, password reset, Roles & Profile creation, user group creation, updating company profile, and Network access setup.

- Involved in setting up field-level access for each custom object created based on the user's role within the organization.
- Developed various Custom Objects, Tabs, Fields, Page Layout, Entity-Relationship data model, validation rules, and workflow rules as per the business need.
- Involved in the Data Transformation and Data Cleaning activities while transferring the data to the external system using Informatics on Demand.
- Defined lookup and master-detail relationships on the objects and created junction objects to establish connectivity among objects.
- Involved in field & page layout customization for the standard objects like Campaigns, leads, accounts, Contacts, Opportunity, Cases, Reports, and Dashboards.
- Defined related tasks, time triggered tasks, email alerts, and filed updates to implement business logic.
- Designed, developed, and deployed Apex Classes, Controller Classes, and Apex Triggers, packages for various functional needs in the application.
